The **Squids 3745 Tool Grip and Tether Attachment Point** (2-pack) provides a versatile solution for securing screwdrivers and nut drivers, preventing dropped objects in hazardous work environments. Essential for safety compliance, these attachments meet ANSI/ISEA 121-2018 standards and support tools weighing up to 0.45kg. Equipped with a swiveling end cap, this attachment facilitates tool tethering, preventing tangling and binding with lanyards. Built-in trim lines on the sleeve allow customisation for various driver lengths, while a flexible bottom opening accommodates larger nut drivers. Unlike competitors, it supports multiple installations and removals without compromising integrity. Compatible with screwdrivers or nut drivers ranging from 2.5cm to 3.2cm in diameter and with a handle height of 11.4cm, this attachment ensures secure tool tethering in various job site applications.
