

ACCESSORIES

Drop Free Zone Squids 3797 Power Tool Bracket - Grinder Tool Trap

- » **CERTIFIED SAFETY** – Meets ANSI/ISEA 121-2018 standard
- » **CORROSION-RESISTANT BRACKET** – Stainless-steel design withstands weathering in diverse conditions
- » **INNOVATIVE DESIGN** – Directs lanyard away from grinder wheel for added safety
- » **VERSATILE USE** – Ideal for corded or cordless angle grinders and similar tools
- » **AMBIDEXTROUS BRACKET** – Flippable design fits both sides of tool handles
- » **STURDY FASTENERS** – Includes stainless-steel M8 and M10 hex head bolts
- » **MAXIMUM CAPACITY** – Supports up to 3.63kg
- » **PATENTED TECHNOLOGY** – Unique design enhances safety

The **Squids 3797 Power Tool Bracket - Grinder Tool Trap** revolutionises safety protocols by providing a secure tethering solution for corded and cordless angle grinders and similar power tools. This stainless-steel bracket ensures durability and corrosion resistance, making it suitable for use in diverse weather conditions. Power tools like grinders often lack integrated tethering points, posing risks of dropped objects in elevated work environments. This bracket addresses this issue by creating a robust attachment point that securely fastens to open screw ports on grinders. Its innovative design strategically directs the tool lanyard away from the grinder's wheel, minimising potential hazards during operation. Installation is straightforward – simply mount the bracket onto screw ports intended for removable grinder handles. Once securely fastened, connect a tool lanyard to the designated tether point for immediate use. Its patented design reflects a commitment to innovative solutions that meet the demanding safety needs of industrial settings, ensuring peace of mind for workers and supervisors alike.

Lanyards and tools not included

DIMENSIONS
Fits most angle grinders

WEIGHT RATING
3.63kg

SCAN TO ORDER

SIMPLE INSTALLATION

1. Hold the bracket and align it with the screw port on the grinder handle.
2. Insert the provided M8 hex head bolt through the bracket into the screw port.
3. Tighten the bolt to secure the bracket to the handle.
4. The bracket is now firmly attached and ready for use.

Using the hex head bolt provided, connect bracket to removable grinder handle

SECURE & STRONG RETROFIT ATTACHMENT POINT

Creates a retrofit attachment point for lanyards on hard secure powertools

VERSATILE DESIGN

Ambidextrous design allows it to be flipped to either side of the tool handle

MAXIMISING SAFETY

3755 Self-Adhering Tape Trap

Used in conjunction with the 3755 Self-Adhering Tape Trap to minimise tangles
