

SPECIALTY WORKWEAR

Heat & Hydration

Chill-Its 6700CT Evaporative Cooling Bandana with Cooling Towel – Tie

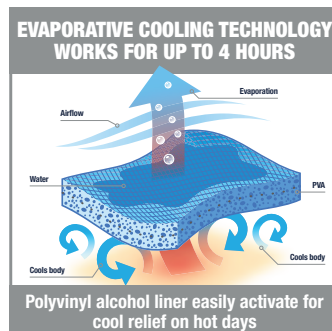

- » **COOLING RELIEF** – Hyper-evaporative PVA easily activates with water for up to four hours of cooling
- » **LOW-PROFILE** – For no-bulk wear under hard hats
- » **COMFORTABLE** – 100% cotton bandana
- » **TIE CLOSURE** – Adjustable for a snug, comfortable fit on a variety of head sizes
- » **WORKDAY TO WEEKEND** – Great for outdoor recreation such as running, hiking or other activities

The **Ergodyne Chill-Its 6700CT Cooling Bandana** features advanced PVA cooling technology for relief in extreme heat. Lightweight and low-profile, this bandana is perfect for wear around the neck or under hard hats. A tie closure in the back makes for an adjustable, snug fit on a variety of head sizes. Heat-related illness continuously ranks among the top causes of worksite accidents and fatalities. Evaporative cooling technologies such as PVA (polyvinyl alcohol) are a simple, effective and comfortable solution for heat stress prevention. Similar to how sweat cools the body, evaporative technologies use an external water source to draw heat away—helping to regulate body temperature while providing cool relief. When activated, this PVA cooling bandana is comfortable and refreshing for even the hottest days of the year.

HOW TO ACTIVATE

Run under water for one minute to activate instant cooling relief that lasts for up to four hours. The PVA will retain water without bulk or residue. Machine wash as needed and hang to dry. Note that PVA materials stiffen as they dry. Simply run under water to reactivate and soften. Ideal for construction, mining, landscaping, roofing or anyone working in the heat. It also makes a great headband for running, hiking and other recreational activities.

DIMENSIONS
90.2cm X 5.08cm
