- » **SECURE FIT** – Rubber track webbing prevents riding up
- » **SIZING** – Waist size ranges from 64cm - 147cm
- » **CARE** – Machine wash cold; air dry

The **ProFlex 1600 Standard Elastic Back Support** is designed to remind workers of proper lifting techniques while also enhancing the body's intra-abdominal pressure, moving the stress away from the spine for back pain relief. Features an all elastic 9-inch body for extra-firm support. ProFlex Back Supports provide lower back support and abdominal support for lifting heavy objects. Tightening the back support belt enhances the body's intra-abdominal pressure and moves the stress away from the spine. When the back support is on correctly, the worker will have additional support for lifting and is more likely to use proper posture. Great for airport luggage handlers, warehouse/distribution employees, material handling, construction crews, maintenance, assembly/fabrication, landscaping/grounds and jobs that require heavy lifting.

ADJUSTABLE & DETACHABLE SUSPENDERS

Elastic material is flexible, breathable with extra firm support

ENGAGED POWER PANELS FOR EXTRA SUPPORT

Power panels for enhanced support while lifting and extended body length

DIMENSIONS

Waist size ranges from 64cm-147cm

SCAN TO ORDER

Step 1/ Slip the back support on.

Step 2/ Grasp each end of the waistband. Stretch the right end across the left and attach. The upper edge of the waist band should be below the navel.

Step 3/ Adjust straps for a comfortable fit without tension.

Step 4/ Before you lift - grasp the outer elastic bands and stretch forward as far as possible.

Step 5/ Secure bands in comfortable position.
