HEAD PROTECTION

SUPPORT WHERE YOU NEED IT

Pryme in collaboration with Ergodyne offer support and ergonomic PPE for physically demanding industries in Australia and New Zealand. Our **Knee Support**, **Back Support**, **Hand Protection** and **Head Protection** products address unique challenges faced by workers, reducing injuries and promoting safety, while not compromising on comfort.

KNEE SUPPORT

BEND BUT DON'T BREAK

Ergodyne's Knee Support products are carefully crafted using advanced materials that strike the perfect balance between flexibility and rigidity. This design ensures that workers can perform tasks with ease and freedom of movement while still receiving the necessary support.

BACK SUPPORT

WE'VE GOT YOUR BACK

Our back supports are ergonomically designed to provide stability and reinforcement to the lumbar region and surrounding muscles. By offering targeted support to the lower back, these products encourage employees to maintain the correct posture while lifting heavy objects.

HAND PROTECTION

LET US GIVE YOU A HAND

Hand injuries are common in various industries. Our range of Anti Vibration Gloves offer protection against injuries caused by repetitive vibration exposure. Integrating wrist supports for recovery and using these gloves for prevention creates a comprehensive safety approach.

HEAD PROTECTION

KEEP YOUR HEAD IN THE GAME

Built for the legion of fearless pros who go headfirst (sometimes literally) into small spaces and confined quarters. Those tight places where head-knock hazards abound but a hard hat just won't fit... enter the Skullerz range of Bump Cap Hat - the next generation in head protection.

Investing in quality support and ergonomic PPE from Ergodyne is crucial for workplace safety in high-risk industries. Their products ensure comfort, mobility, and durability, fostering a culture of well-being for all workers in Australia and New Zealand.
