SPECIALTY WORKWEAR

Cooling Vests

Chill-Its® 6210 Phase Change Cooling Vest

UP TO 2 HOURS OF COOLING

18°C PHASE CHANGE COOLING

KEY FEATURES

- Phase change cooling at a steady 18°C for up to 2 hours
- No airflow required: suitable for dry heat and high humidity
- Activate in ice water in as little as 10 minutes, a freezer in 2–3 hours or a refrigerator in 5–6 hours
- Adjustable hook-and-loop shoulder straps and side-release waist buckles
- Low-profile, contoured design for wear over or under clothing
- Lightweight construction: under 1.36 kg (3 lb)

DESCRIPTION

The Chill-Its® 6210 Phase Change Cooling Vest provides contact cooling without relying on airflow or evaporation. Its phase change material maintains a steady 18°C for up to two hours, making it suitable for indoor and outdoor work in dry or humid conditions.

The all-in-one vest has a flexible, contoured shape and a nylon-coated exterior that resists light abrasion. Adjustable shoulder straps and waist buckles help keep it close to the torso. Recharge the whole vest using ice water, a freezer or a refrigerator before reuse. Activation times vary with cooling conditions.

CONTACT COOLING

Steady 18°C cooling for up to 2 hours. No airflow required.

ADJUSTABLE FIT

Shoulder straps and waist buckles. Fits up to a 157 cm chest.

RECHARGE & REUSE

Ice water: from 10 min. Freezer: 2–3 hr. Fridge: 5–6 hr.

LOW-PROFILE DESIGN

Flexible, contoured panels for wear over or under clothing.

ADJUSTABLE FIT
Up to 157 cm chest (62 in)
